

ABDUL MARUK KHAN

📍 Paschim Medinipur district, West Bengal, India ✉️ abdulmaruf9024@gmail.com 🌐 Oxu0.tech

SUMMARY

Computer Science student with a strong interest in offensive security and bug hunting. Skilled in identifying vulnerabilities, analyzing security flaws, and understanding real-world attack vectors. Passionate about cybersecurity, continuous learning, and improving system security through hands-on practice.

PROJECT

KnowledgeNest-AI

Final Year Project (ML) • April 2026 – June 2026

- AI-Powered Academic Recommendation & Learning Assistant
- ML-powered topic recommendations using TF-IDF + K-Means

NexUnit

College Group Project • November 2025 – January 2026

- Developed an MCP server enabling LLMs (Claude/GPT) to execute security tools via tool-calling workflows
- Orchestrated automated workflows for recon, scanning, and exploitation, integrating over 150 tools for enhanced system security analysis.

EDUCATION

Diploma in Computer Science and Technology (Pursuing)

Itahar Government Polytechnic • Itahar, Porsha, West Bengal, 733128 • 2026 • 8.2 GPA

Madhyamik

Gobardhanpur Pramathanath Vidyayatan • Gobardhanpur, pingla, paschim medinipur • 2022 • 61%

CERTIFICATIONS

WEB-300: Advanced Web Attacks and Exploitation (In Progress)

OffSec • 2026

- Currently pursuing advanced web exploitation techniques, focusing on real-world exploitation techniques such as authentication bypass, SQL injection, XSS, and insecure deserialization. Strengthened practical skills in identifying and exploiting complex web vulnerabilities.

PEN-200: Penetration Testing with Kali Linux

OffSec • 2023

- Relevant to offensive security and penetration testing, providing hands-on experience in vulnerability discovery, exploitation, and real-world attack scenarios.

SKILLS

Languages: Python, Bash, SQL

Tools: Nmap, Burp Suite, Metasploit, Wireshark

Platforms: Linux (Kali, Ubuntu)

Concepts: Web Security, Recon, Exploitation
