

ABDUL MARUF KHAN

Paschim Medinipur, West Bengal, India | abdulmaruf9024@gmail.com | abdulmaruf.me | [GitHub](https://github.com)

SUMMARY

Computer Science student specializing in offensive security and bug hunting, with hands-on experience in vulnerability research, exploit development, and security tool automation. Currently pursuing OffSec's WEB-300 (Advanced Web Attacks and Exploitation) and holds the OffSec PEN-200 certification. Passionate about continuous learning and improving real-world system security through practical, hands-on work.

PROJECTS

KnowledgeNest-AI

April 2026 – June 2026

Final Year Project (Machine Learning)

- AI-powered academic recommendation and learning assistant for students.
- Built ML-driven topic recommendations using TF-IDF vectorization and K-Means clustering.

Repository: [GitHub](https://github.com)

0xCipherChat

2026

End-to-End Encrypted Messaging Platform

- Built a full-stack, end-to-end encrypted chat application with real-time messaging, voice/video call simulation, and group chat support.
- Implemented E2E encryption using X25519 key exchange with XSalsa20-Poly1305 authenticated encryption (TweetNaCl).
- Stack: Express.js and Socket.IO backend with PostgreSQL/Drizzle ORM, React Native (Expo) mobile client, and JWT-based authentication.

Repository: [GitHub](https://github.com)

EDUCATION

Diploma in Computer Science and Technology (Pursuing)

2026

Itahar Government Polytechnic — Itahar, Porsha, West Bengal, 733128 · GPA: 8.2

Madhyamik (Secondary Education)

2022

Gobardhanpur Pramathanath Vidyayatan — Gobardhanpur, Pingla, Paschim Medinipur · 61%

CERTIFICATIONS

WEB-300: Advanced Web Attacks and Exploitation (In Progress)

OffSec · 2026

- Pursuing advanced web exploitation techniques including authentication bypass, SQL injection, XSS, and insecure deserialization.

PEN-200: Penetration Testing with Kali Linux

OffSec · 2023

- Hands-on experience in vulnerability discovery, exploitation, and real-world offensive security scenarios.

SKILLS

Languages: Python, Bash, SQL

Tools: Nmap, Burp Suite, Metasploit, Wireshark

Platforms: Linux (Kali, Ubuntu)

Concepts: Web Security, Reconnaissance, Exploit Development
